PANGA NARESH

Junior Software Engineer | Full-Stack (MERN) Developer | AI/ML

Hyderabad, Telangana | 7569383323 | panganareshyadav24@gmail.com

Portfolio | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Junior Software Engineer at VillagKart Private Limited (Product & Technology) with a strong MERN full-stack foundation (React.js, Node.js, Express.js, MongoDB) and 6+ months of prior industry experience as an AI Programmer Intern. Experienced in REST API design, JWT authentication, and deploying full-stack apps, plus hands-on AI work in LLM integration (Ollama), voice-enabled chatbots (Sarvam AI), and NLP text classification.

EXPERIENCE

Junior Software Engineer — VillagKart Private Limited *Oct 2026 – Present*

Product & Technology Department — Full-Time

- Develop and maintain full-stack web application features as part of the Product & Technology team using React.js, Node.js, Express.js, and MongoDB.
- Design and integrate RESTful APIs, applying JWT-based authentication and role-based access control to build secure, scalable backend services.
- Collaborate with product and engineering teams to translate requirements into working features, with code reviews and Git/GitHub version control.

AI Programmer Intern — ReatchAll Private Limited *Mar 2026 – Sep 2026*

Hyderabad, Telangana — On-site

- Built AI chatbots using Sarvam AI models (Sarvam, Bulbul, Anuska) for customer interaction and business automation.
- Integrated open-source Large Language Models (LLMs) via Ollama for local, on-premise AI inference, avoiding dependency on external LLM APIs.
- Built voice-enabled AI agents using NLP and speech processing for hands-free conversational interactions on web and mobile.
- Designed RESTful APIs and MERN Stack backend services (Node.js, Express.js, MongoDB, React.js) to connect AI features into ERP modules and business-automation applications.

AICTE OIB-SIP Python Programming Internship — Oasis Infobyte *Nov 2024 – Jan 2025*

Remote

- Completed Python projects covering data structures, file handling, and object-oriented programming.

PROJECTS

Spam Review Detection — Machine Learning / NLP Project

- Built a machine learning model in Python to detect spam/fake e-commerce reviews using TF-IDF and Word2Vec feature extraction.
- Applied text preprocessing techniques — tokenization and stop-word removal — to prepare review text for classification.
- Evaluated model performance using accuracy and precision metrics to compare feature-extraction approaches.

Stack: Python, Scikit-Learn, NLP, SQL

Livora Hostel Hub — Full-Stack Application (MERN)

Admin Portal | Tenant Portal

- Built a full-stack hostel management application with Owner/Tenant portals, JWT-based role-based access control, and React.js/Node.js/Express.js REST APIs backed by MongoDB.

Stack: MongoDB, Express.js, React.js, Node.js, JWT, Vercel

FamilyHub OS — Real-Time Collaboration Platform

Live Demo

- Built a real-time collaboration platform with shared task lists and instant updates via Socket.IO, using Node.js/Express.js REST APIs, PostgreSQL, and JWT authentication.

Stack: React.js, Node.js, Express.js, PostgreSQL, Socket.IO, JWT

TECHNICAL SKILLS

Programming: Python, JavaScript, SQL, R

AI / Machine Learning: Machine Learning, NLP, Scikit-Learn, Pandas, NumPy, TF-IDF, Word2Vec

Generative AI / LLM: LLMs, Ollama, AI Chatbots, Sarvam AI

AI Application Development: Voice-Enabled AI Agents, REST APIs, AI Automation

Backend / Full Stack: Node.js, Express.js, React.js, MongoDB

Databases: MongoDB, MySQL, PostgreSQL

Tools & Other: Git, GitHub, Postman, VS Code, Jupyter Notebook, Vercel, Microsoft Excel, Power BI

EDUCATION

B.Tech — Computer Science & Data Science *2022 – 2026*

Vignan Institute of Technology and Science, Hyderabad

CERTIFICATIONS

NPTEL (IIT Madras): The Joy of Computing Using Python | HackerRank: Python Programming | Forage (Tata Group): Data Visualisation
